V O Y E J[®]

History

VOYEJ is a premium leather goods brand which has been ‘sailing’ since February 11th, 2011 up until now. Inspired by a man's passion on journey, VOYEJ, as a brand, try to imply the excitement of having a personal journey through leather goods made of well chosen materials. The “journey” itself is presented through the customer experiences of leather color evolution process by using natural vegetable tanned leather goods.

Each of VOYEJ product is designed with ‘simple yet esthetic’ philosophy in mind in order to create a functional product that has clean and modern feels to suit the present lifestyle. VOYEJ products are proudly hand-made by skillful and experienced local craftsmen in Indonesia.

Handmade Process

Our products are proudly handcrafted by skillful and experienced artisan. The making process takes considerable amount of time for most of it is done by hand, ranging from leather pattern cutting, skiving, stitching, burnishing, until assembling parts to create the final product. We believe handmade process is an unspoken way to express sincere passion as well as attention to details and quality.

Patina

Color evolution process is a personal journey because it may vary depends on the usage and leather treatments given to the leather goods by each person.
